

Point of Care Service

Spend less time at the cabinet, more time with patients

Automated Dispensing Cabinets (ADCs) are a staple piece of technology in just about every health system, helping to increase efficiency and improve safety for medication dispensing at the point of care. But are you getting the full value out of these powerful devices? Most health systems don't. Learn how Omnicell's Point of Care Service helps enhance your cabinet functionality to increase return on investment and relieve overwhelmed nursing and pharmacy staff, giving them more time to focus on patients.

54%

Less time spent
at the cabinet*

With market-leading automation, adoption and performance optimization, and expert support, Omnicell's Point of Care Service reduces manual tasks and improves nursing and pharmacy efficiency.

A Comprehensive Service to Accelerate and Sustain Value

Omnicell's subscription-based Point of Care Service combines technology-driven automation, connected intelligence, and expert services to optimize adoption, utilization, and the overall performance of your ADCs.

Technology

It all starts with our XT Automated Dispensing Cabinets. This dispensing technology enables smarter and safer medication management while streamlining workflows for both nurses and pharmacists.

Patient-Specific Medication Management

One place to manage all medications, supporting greater cabinet inventory and improving control and access.

EHR-Integrated Medication Queuing

Streamlines medication dispensing, giving nurses more time at the bedside.

Single Dose Controlled Substance Dispensing

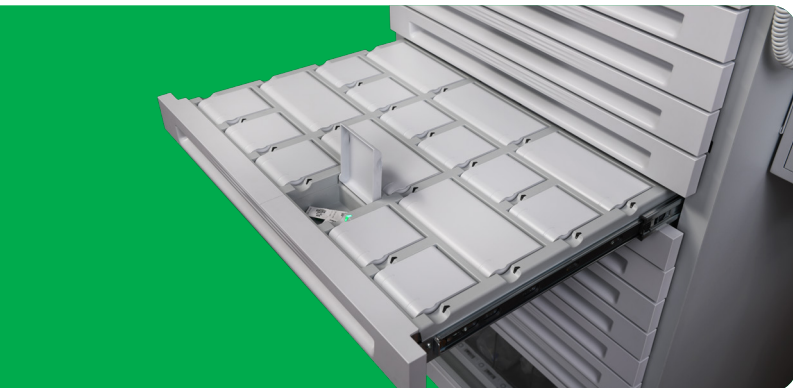

Improves controlled substance security while eliminating the need for countbacks.

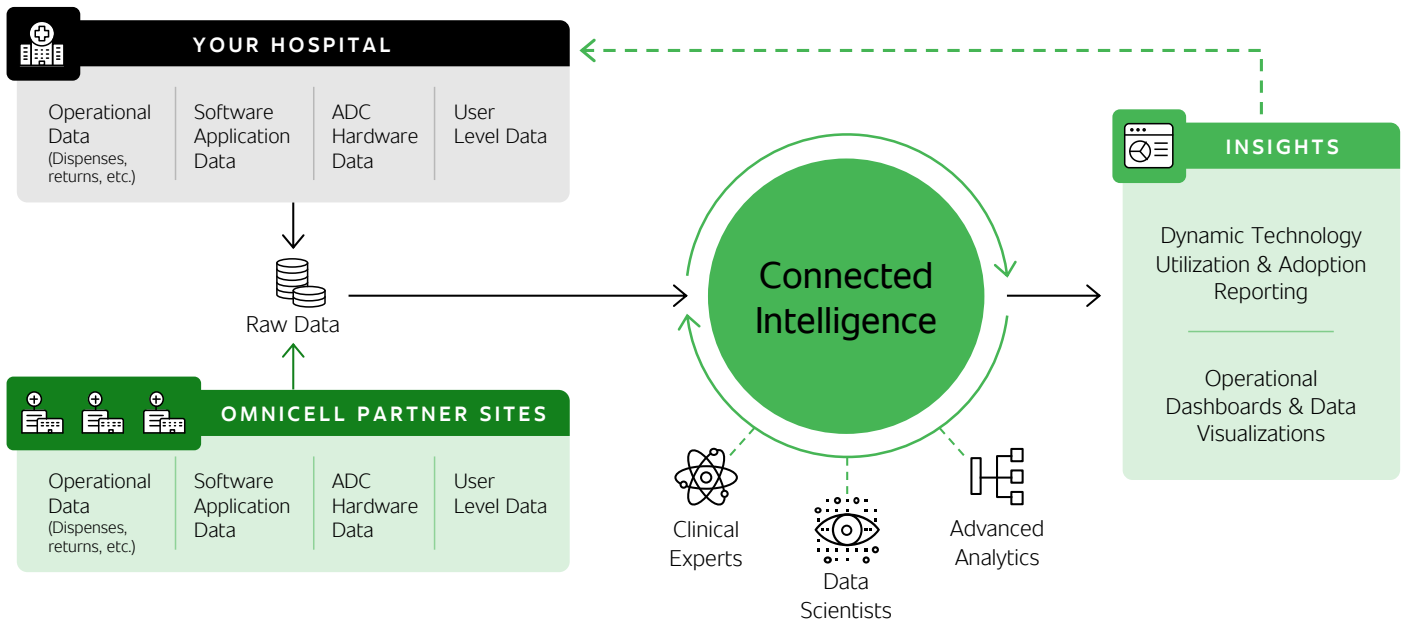

Closed-Loop Controlled Substance Management

Superior data visibility to drive accountability and compliance.

Connected Intelligence

Omniceil XT cabinets offer much more than a dedicated hardware and software solution. With our Point of Care Service, each cabinet is part of a connected ecosystem where operational and user-level data across multiple Omnicell partner sites are shared, enabling real-time advanced analytics, data visualization, and powerful reporting and benchmarking capabilities.

Advanced Analytics

Cabinet, software, and user data are carefully analyzed to identify usage patterns and opportunities for improvement.

Data Visualization

Insights are clearly presented via graphical operational dashboards for easy interpretation and action.

Reporting and Benchmarking

Omniceil's connected ecosystem allows you to compare your performance to your peers.

Expert Services

OmniceLL's Point of Care Service includes a robust array of implementation, change management, and optimization services to accelerate time to value and ensure ongoing outcomes.

Professional Services

Technology Installation and Configuration

Custom assessment and readiness focused on system readiness.

Program and Change Management
